WORK EXPERIENCE

Assistant System Engineer

Tata Consultancy Services Ltd.

📅 Jan 2020 – Nov 2021   📍 Hyderabad, India

- Worked as a System Engineer in BT-Ireland Application Support for Kenan Arbor Billing System and Bills on Disk (BOD) application.

PROJECTS

BT-Ireland Application Support

TCS

📅 Jan 2020 – Nov 2021   📍 Hyderabad, India

- BT Ireland is a part of British Telecom which provides Telecom services to the Ireland region.
- Responsible for billing the customers based on their usage and worked on the CDR's that were collected from the different downstream systems.
- Involved in monitoring file collection and production issue analysis.

Crypto Dashboard

https://github.com/Priyatham-Reddy7/Crypto-Dashboard

- Simple UI web application built with React and Axios that provides information to the user about crypto currency exchange rates.
- This application fetches the crypto exchange rates for selected currencies and crypto newsfeed from Rapid API and displays it to the user.

Expense Tracker

https://github.com/Priyatham-Reddy7/ExpenseTracker

- UI web application built with React involving Context hook where users can add their money transactions and check income, expenses and balance amount.
- Involves React hooks like useContext, useState and useEffect.

Support Desk

https://github.com/Priyatham-Reddy7/support-desk

- A Full Stack Application built using React, Redux-toolkit, Node.js and MongoDB.
- This application basically works as a ticketing tool to escalate any issues that user is facing with their product.
- Using the Notes functionality user can communicate back and forth with the admin/staff.
